VOL. 602 NOS. 1+2 JOURNAL OF CHROMATOGRAPHY JUNE 5, 1992

CONTENTS

INTERNATIONAL ION CHROMATOGRAPHY SYMPOSIUM 1991, DENVER, CO, OCTOBER 6–9, 1991

Foreword
by J. D. Lamb 1

Ion-interaction chromatography: a study of the distribution of *n*-alkylammonium ions on an ODS-2 column
by L. G. Daignault and D. P. Rillema (Charlotte, NC, USA) 3

Expert system for ion chromatographic methods using dynamically coated ion-interaction separation
by M. Mulholland, P. R. Haddad and D. B. Hibbert (Kensington, Australia) 9

Applications of an alternative stationary phase for the separation of anions by chemically suppressed ion chromatography
by R. Saari-Nordhaus and J. M. Anderson, Jr. (Deerfield, IL, USA) and K. Ravichandran (Indianapolis, IN, USA) . 15

Direct resolution of organic acid enantiomers on a novel polymer-based stationary phase
by L. Castellani, F. Federici, M. Sinibaldi and A. Messina (Rome, Italy) 21

Evaluation of low-conductance eluents for suppressed ion-exclusion chromatography
by H. F. Botte and L. Joergensen (Odense, Denmark) 27

Studies on eluents suitable for use with simultaneous conductivity and direct UV detection in non-suppressed ion chromatography
by P. E. Jackson and T. Bowser (Lane Cove, Australia) 33

Approaches to gradient elution in ion-exclusion chromatography of carboxylic acids
by R. Widiastuti and P. R. Haddad (Kensington, Australia) and P. E. Jackson (Lane Cove, Australia) 43

Direct serum injection in ion chromatography on packing materials with a semi-permeable surface
by W. Buchberger, H. Malissa and E. Mülleder (Linz, Austria) 51

Dialytic clean-up of alkaline samples prior to ion chromatographic analysis
by S. Laksana and P. R. Haddad (Kensington, Australia) 57

Analysis of oxyhalide disinfection by-products and other anions of interest in drinking water by ion chromatography
by D. P. Hautman and M. Bolyard (Cincinnati, OH, USA) 65

Determination of trace anions in hydrofluoric acid by ion chromatography
by G. Vanderford (Austin, TX, USA) 75

New approach to the analysis of low levels of anions in water
by G. Bondoux, P. Jandik and W. R. Jones (Milford, MA, USA) 79

Determination of trace anions in concentrated acids by means of a moderate-capacity anion-exchange column
by A. Siriraks, C. A. Pohl and M. Toofan (Sunnyvale, CA, USA) 89

Separation and indirect visible detection of inorganic and organic analyte cations on dye-coated stationary phases
by T. A. Walker (Kansas City, MO, USA) 97

New thiohydrazones for complexation and chromatographic determination of metal ions
by Y. Qian and J. S. Fritz (Ames, IA, USA) 103

Ion chromatography of metal cations on carboxylic acid resins
by J. Morris and J. S. Fritz (Ames, IA, USA) 111

High-performance ion chromatographic separation of uranium and thorium in natural waters and geological materials
by M. P. Harrold, A. Siriraks and J. Riviello (Sunnyvale, CA, USA) 119

Dual-column techniques for the simultaneous analysis of anions and cations
by R. Saari-Nordhaus, L. Nair and J. M. Anderson, Jr. (Deerfield, IL, USA) 127

Application of ion chromatography to corrosion studies
by B. K. Nash and R. G. Kelly (Charlottesville, VA, USA) 135

Forensic applications of coupling non-suppressed ion-exchange chromatography with ion-exclusion chromatography
by L. A. Kaine, J. B. Crowe and K. A. Wolnik (Cincinnati, OH, USA) 141

Analysis of commercial explosives by single-column ion chromatography
by I. K. Henderson and R. Saari-Nordhaus (Deerfield, IL, USA) 149

Matrix elimination in ion chromatography by "heart-cut" column-switching techniques
by S. R. Villaseñor (St. Louis, MO, USA) 155

Qualitative corrosion monitoring by on-line ion chromatography
by D. Bostic (Surry, VA, USA), G. Burns (Sebastopol, CA, USA) and S. Harvey (Chattanooga, TN, USA) 163

Ion chromatographic analysis of inorganic molecular metal–oxygen cluster compounds
by A. Jürgensen, G. B. McGarvey and J. B. Moffat (Waterloo, Canada) 173

Ion chromatography as a tool for optimization and control of fermentation processes
by L. Joergensen, A. Weimann and H. F. Botte (Odense, Denmark) 179

Separation of nucleotides and nucleosides by gradient macrocycle-based ion chromatography
by J. D. Lamb and Y. K. Ye (Provo, UT, USA) 189

Liquid chromatography and postcolumn indirect detection of glyphosate
by M. J. Lovdahl and D. J. Pietrzyk (Iowa City, IA, USA) 197

Regulated methods for ion analysis
by J. P. Romano and J. Krol (Milford, MA, USA) 205

Determination of reaction by-products in high-molecular-weight polysulfonated scale inhibitors by ion chromatography
by S. E. Atwood (Littleton, CO, USA) 213

Applications of capillary ion electrophoresis in the pulp and paper industry
by D. R. Salomon (Calgary, Canada) and J. Romano (Milford, MA, USA) 219

Bonded-phase capillaries and the separation of inorganic ions by high-voltage capillary electrophoresis
by M. Chen and R. M. Cassidy (Saskatoon, Canada) 227

Capillary electrophoretic determination of alkali and alkaline-earth cations in various multiple electrolyte solutions for parenteral use
by M. Koberda, M. Konkowski and P. Youngberg (Round Lake, IL, USA) and W. R. Jones and A. Weston (Milford, MA, USA) 235

Explosive residue analysis by capillary electrophoresis and ion chromatography
by K. A. Hargadon (Washington, DC, USA) and B. R. McCord (Quantico, VA, USA) 241

Effect of electrolyte composition on the separation of inorganic metal cations by capillary ion electrophoresis
by A. Weston and P. R. Brown (Kingston, RI, USA) and A. L. Heckenberg, P. Jandik and W. R. Jones (Milford, MA, USA) 249

Applications of ion chromatography and capillary ion electrophoresis in the alumina and aluminium industry
by S. C. Grocott and L. P. Jefferies (Kwinana, Australia) and T. Bowser, J. Carnevale and P. E. Jackson (Lane Cove, Australia) 257
